

Looking at Europe? Choose EXA Infrastructure.

The network to connect APAC service providers to Europe and beyond.

Who are EXA Infrastructure

- Headquartered in London, UK, EXA Infrastructure is the **largest dedicated digital infrastructure platform connecting Europe and North America**, owning 155,000 km of fibre network across 37 countries. EXA's network connects over 300 cities and offers sub-sea routes that include **six diversified transatlantic cables**. It also boasts the lowest latency links between Europe and North America, EXA Infrastructure Express. EXA Infrastructure's focus is clear: to become the undisputed leader of DC
- **Award-winning infrastructure:**
 - "Best Pan European Wholesale Carrier 2022" by Capacity Media
 - "Best Fiber Infrastructure Deployment 2022" by Telecom Review
 - "Best Telco Newcomer", "Best Avant-Garde Marketing Exposure", "Best Europe Provider" awards by Antonio Meucci Global Telco Awards, 2023.

EXA Infrastructure: enabling your growth

- Europe, positioned as the largest and most strategic node in the global internet backbone, plays a pivotal role in facilitating seamless connectivity between North America, Africa, and the Middle East. Its geographically advantageous location not only serves as a crucial hub for the ever-expanding network of subsea cable systems but also efficiently channels the escalating volume of data traffic traversing the continents. Moreover, Europe's robust and interconnected infrastructure fosters international collaboration, making it a central nexus for the exchange of digital information and a key driver of the global digital economy.
- EXA Infrastructure owns and manages the **only truly Pan-European fiber back-bone network**, combined with colocation facilities. EXA Infrastructure also owns and manages eight subsea cables (including three transatlantic) and 20 cable landing stations in key landing points.
- More than 20 years of experience in building and managing critical infrastructure to serve the most demanding customers, and our solid financial backing means we are **the ideal partner for any organisation needing to access Europe**. EXA Infrastructure is Europe for any connectivity needs.
- WE know organisations need reliable, scalable and secure network services and that's why we don't only build or upgrade into the traditional telco hubs/routes, but we strategically invest, build and expand our network to get closer to the borders of the EU continent via diversified routes. EXA Infrastructure's mission is to meet and take charge of all the new data traffic landing in Europe, by land and sea.
- the borders of the EU continent. EXA's mission is to meet and take charge of the new data traffic landing in Europe, by land and sea.

Why partner with EXA Infrastructure

- EXA Infrastructure is a **neutral telecom provider**: we may appear a small player but we are mighty – transporting 185 Tbs of traffic on our network, we estimate that around 60% of the internet traffic in Europe is carried by our network. We are agile enough to remain accessible and we pride ourselves to be flexible in supporting our customers' bespoke needs and excelling at delivering the network scale of an industry top player.
- **We don't compete with our customers** on their own managed services, cloud and content offerings. Instead we remain focused on our core offering – Infrastructure, Transport, Colocation and Professional Services - to provide the best in class services that make you more successful with your end customers.
- EXA Infrastructure is a unique **"one stop shop"** for your bandwidth needs in Europe: providing the gateway to Europe for major operators from North America, Africa, Asia and the Middle East. Our standard SLA framework ensures our customers receive the same service levels wherever you're located. In addition, being present in 34 countries, you can rest reassured that we comply with local sovereignty requirements.
- The **EXA Infrastructure network is dense and diversified**, meaning we can provide high capacity and a wide choice of alternative paths avoiding the most congested traditional routes, with less bounces, lower latency, increased security and competitive commercial terms,
- Our **Cable Landing Stations (CLS)** are strategically located to take charge of subsea systems arriving in Europe from APAC via the Mediterranean, and we keep adding new ones. At the moment we are present in:
 - Mazzara del Vallo (Sicily - Italy) with two CLS
 - Bari (Puglia - Italy)
 - Crotona (Calabria – Italy)
 - Marseille (France)
 - Greece (Crete)
